Print Technique Books

Available in 5 Convenient Editions: Estate, Business, Retirement Planning, Life Insurance Product and Family Financial Needs.

At the heart of our product line are our Technique Books, available in 5 popular editions: Estate Planning, Business Planning, Retirement Planning, Life Insurance Product uses and applications, and Family Financial Needs. Each concept uses the same, highly effective Kugler case study format. Our clean layout and easy-to-understand diagrams enable you to present to your clients and prospects the value of even the most complex concepts. For each concept, you get a diagram or illustration plus sections covering Pertinent Information, Goals & Objectives, the Proposed Arrangement and, of course, Results & Benefits.

Price: \$160 for Estate (141 cases), Retirement (128 cases) or Family Needs Technique (83 cases) Books and \$100 for Business Planning (66 cases). New for 2009 – Our Life Insurance Product Book is now a 2-volume set with 150+ cases and a new format. Cost: \$99.95.

Electronic Technique Books

All of our books are available electronically as well, with easy access to the techniques presented in PDF format. We'll work with you to tailor a site license or bulk-discounted order that meets your unique needs. Current electronic edition users rave about the simplicity of having one-click access to any technique needed, any time they want it! It's great reference material. We can supplement this program with a trainer's guide, multiple choice exams, PowerPoint presentations and even transcripts for Kugler courses we've developed on much of the subject matter.

Call us today to inquire about a proposal for your program.

Topic-Based Mini Electronic Books & PowerPoint Presentation

These are a low-cost, easy way to integrate subject-based material into your training program.

Best of Kugler Collection: Case Studies in Estate, Business and Life Insurance Products

Get 30 of our most popular, highly effective cases & slides right now. We'll customize this edition with your name for field use and send you the PDF today! These are Frank Rainaldi's own, hand-selected cases that are directly or indirectly used in conjunction with life insurance. Several cases deal with techniques to provide tax-free income to an ILIT while eliminating the need for annual exclusion gifts

Practical Applications for Roth IRAs

This is EVERYTHING you need to know about Roth IRA conversion – presented in the popular Kugler format you know and trust. You get the 20 different factors that should be considered before implementing a Roth conversion, covered in 38 easy-to-follow, mini-cases designed to show the differences between traditional and Roth IRAs.

E-Learning

We custom-build online training, continuing education courses and other online and live programs for clients of all sizes. We start with our popular Technique Book case study format and using that as the basis for a highly interactive and memorable learning experience. Your learners will get an unmatched experience that we guarantee will help them master critical concepts and develop better and more profitable relationships with clients and prospects. Each course includes extensive audio and interactive quizzes at the end of each lesson. We also leverage multimedia techniques, such as animation and Flash, to ensure learners get a compelling, easy-to-follow experience. Audio is structured as though a presentation is being made to a client. Common objections and/or questions are also covered.

Price: Custom solution; call for pricing.

CE Credit

We have 10 hours of live CE programming approved and ready to go. The 10 hours are structured and filed for CE into three segments. Estate Planning 3 hours, Retirement Planning 3 hours, Business Planning and Life Insurance 4 hours. **It's 100% approved in all 50 states for up to 10 credits (Insurance, CFP, CPA and CLE).** **Custom solution; call for pricing.**

Customizable Software

Kugler System for Windows

We continue to offer our popular Kugler System for Windows to customize your presentations. This program allows you to input the data and customize each concept included in our Estate and Business Planning Technique Books.

Price: \$390 for Estate Planning. \$250 for Business Planning. Site license or per-seat fee based on total usage

Estate Analyzer for Windows from Brentmark Software

Leverage the power of Kugler's techniques by customizing your presentation with the ALL NEW-Kugler estate analyzer. This flexible software produces a comprehensive up-scale estate plan. It includes techniques such as Rolling GRATs, QPRT's FLP's, Sales to Grantor Trusts, CLATs, CRTs, GST Trusts, Charitable Gifts, etc.

First you list the asset value and ownership arrangement. At that point the estate settlement costs (**including state death tax**) are calculated under the current will arrangement. Then you project future values and the assumed year of death. You then select from over 30 techniques that are correlated directly to the individual estate owner's assets. You select the year the various techniques will be implemented. The program does the rest. It calculates the applicable gift tax and the subsequent estate settlement costs are recalculated to show the savings (individual and cumulative) from each selected technique.

Price: \$600 Site license or per-seat fee based on total usage

Seminar Selling

The diagrams from each technique book are available via PowerPoint slides for various seminar presentations. The presentations may be structured for simple estate planning concepts for consumer seminars or highly technical advanced concepts for other professional groups. **Call for pricing**
